Sun, 04 Nov 2018 09:23:00 GMT Progress in Electromagnetics Research-PIER Journal Impact ... - In this paper we outline a theory of electromagnetic (EM) wave scattering by many small impedance particles (bodies) embedded in a homogeneous medium which is described by the constant permittivity $\epsilon > 0$, permeability $\mu > 0$ and, possibly, constant conductivity $\sigma \neq 0$. The small particles are embedded in a finite domain Ω . Progress in Electromagnetic Research, M (PIER M), 14 ... - Not every article in a journal is considered primary research and therefore "citable", this

chart shows the ratio of a journal's articles including substantial research (research articles, conference papers and reviews) in three year windows vs. those documents other than research articles, reviews and conference papers. Progress in Electromagnetics Research - scimagojr.com -
